

INTELLIGENT LOADING CONTROL SYSTEM

 MAKE COMPLEX TASKS SIMPLE

THE LOADING SKIDS AND CONTROL SYSTEMS PROVIDED BY CCLPEC HAVE UNDERGONE TENS OF MILLIONS OF HOURS OF OPERATION. OUR EXTENSIVE EXPERIENCE WILL MINIMIZE YOUR TRIAL AND ERROR AND SIGNIFICANTLY REDUCE COSTS.

- **FAST** - Vehicles experience a cumulative time savings of at least 30 minutes from entry to exit. Online debugging and diagnosis lead to a 50% reduction in fault recovery time.
- **STABILITY** - The integration of safety inspection, weighing, and loading processes ensures digital safety verification throughout the entire operation. Data-driven pre-maintenance practices and emergency plans at key nodes enhance stability.
- **EXCELLENCE** - Intelligent scheduling, tank inspection, self-service loading, and self-service weighing functionalities are fully realized.
- **EFFICIENCY** - Each shift benefits from a reduction of at least 8 operational personnel, with standardized operating procedures integrated into the workflow, thereby lowering management costs.
